Poitou-Charentes Region : “Pocket Films Training” for teachers

Monday 12 January 2015, by [Benoît Labourdette](#)

[Red Pixel](#) image pole of the Poitou Charentes region, proposed as part of “Lycéens in cinemas”, that one of the features of the program be replaced by a program of short films shot with mobile phone from the festival [Takavoir](#), and students benefit from a filmmaking workshop day with cell phone. This project was operated by [Hors Champs association Niort](#). I trained workshop leaders, and teachers registered to the program. Great success of the operation, with more than fifty registered classes. It will be made again in 2015-2016 by the Basse Normandie Region in France. I also wrote the [worksheets on films](#).
